

TTL-T50-2MM-R-3

TransTac strip curtain film material, W 300 x 2 mm, roll of 50 m, bronze T50, DIN EN ISO 25980

Description

Welding strip curtains, T50 (red brown), strip material 2 mm

Welding strip curtains are made from this material roll.

TransTac strip curtains help simplify work if you need to transport materials in and out of welding cabins. Workpieces can safely be pushed through the strip curtains without being set down. The strips easily part and close by themselves, which prevents arc or sparks from escaping. The material can easily be cut with a plate shear or a carpet knife.

Advantages of strips:

- Quick delivery
- Adjustment of strip curtains on the spot
- Individual lengths are possible, especially for repairs

Product details:

- Color: T50 (red brown)
- Width: 300 mm
- Thickness: 2 mm
- Roll of 50 m
- Weight: 0,75 kg/m
- Risk factor: approx. 0,70

Certificates:

- DIN EN 1598

General

General continuation

Short Description	TransTac strip curtain film material, W 300 x 2 mm, roll of 50 m, bronze T50, DIN EN ISO 25980
